Realfast Newsletter - May 2010

Realfast places the highest priority on ease-of-use.

Does computer software really need to resemble the cockpit of a commercial jet? Consider the most important functions of real estate forms software.

Up-to-date forms? Check. Access from anywhere? Check. User friendly, time saving and professional? Check, check and check.

Realfast2Go® gives you everything you need without the bloat of buttons, switches, bells and whistles that just get in the way of efficiency.

Realfast delivers the best training and support.

Realfast users may not actually *need* the industry's best technical support. In fact, most Realfast2Go users never call our toll-free technical support service. But those who do call confirm that Realfast is the best in the business.

"Technical support for Realfast2Go is what customer service should be...helpful and able to assist us in solving our challenges." Ann Harold, Broker/Owner, French Broad Real Estate Company, Hot Springs, NC

And our on-demand training means you can get up to speed with Realfast2Go in one hour or less.
