Realfast Newsletter - April 2010

Hey, you look a little GREEN!

Environmentally friendly and cost conscious REALTORS® are "going green". Realfast has been focused on green technology for years. Realfast2Go enables you to manage your contracts 100% paperless.

Green Focus: Electronic Signatures

In choosing an e-signature solution, Realfast considered a mouse/stylus based solution - for about one second! We realized that Realfast2Go is the most professional forms software solution available, so why should we step down to an UNprofessional and inferior e-signature solution that exposed our users to potential risk.

As a former bank manager, I was always hesitant to accept e-signatures due to the risk of fraud. I received many unreadable contract signatures from mouse/stylus solutions - and I rejected them. This didnt make me the most popular banker, but it was the right thing to do not only for my protection, but also for yours.

What's the Solution?

In evaluating several e-signature providers, Realfast found only one real contender. By partnering with DocuSign®, Realfast2Go features the only e-signature solution good enough to be NAR®-endorsed. DocuSign is professional, easy-to-use and completely green. Realfast is excited to offer our customers easy access to the most widely adopted and trusted e-signature solution.
